PHYSICIAN NOTES

Patient Robert Johnson is a 50-year-old male presenting for a routine evaluation. Patient appears well-developed and well-nourished, in no acute distress. Past medical history is significant for hyperlipidemia. Current medications were reviewed and reconciled. Patient denies any new acute symptoms including but not limited to chest pain, shortness of breath, nausea, vomiting, or focal neurologic distincts. Will continue current management plan. Advised patient to follow up in 6 months or sooner if new symptoms arise.
